

## How to make a T-shirt mask

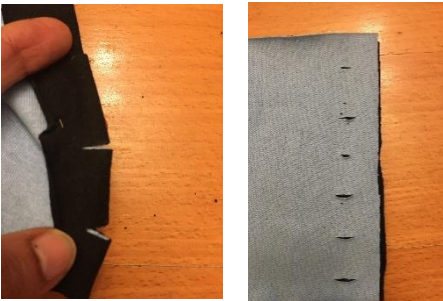

### Materials:

Two rectangle pieces 6" x 9"  
T shirt yarn: 48"

Lay two rectangles of t-shirt material  
with right sides together.

Fold  $\frac{1}{2}$ " on the short side to cut the  
slits. You may pin the layers in place.

Cut 6 small slits being careful not to  
cut through the edges. Make 6 slits on  
one side.

Do the same on the other side.

Thread the yarn through the slits on one  
side, starting from the bottom. If you wish,  
you can use a safety pin to thread faster.

Use the same yarn and thread it on  
the other side, from top to bottom.

When you are done threading it  
through, it will look like this.

Turn inside out and you have a T-shirt  
mask!
